

Heart for peace project

"Heart for peace" is a project initiated by the school "Heinz Galinsky" from Berlin, the students sculpted 240 expressive ceramic hearts Solidarity and commemoration, and together they created a representative as a message for love and peace.

They say: "On Saturday, October 7, in view of the brutal terrorist attack on the citizens of the State of Israel, broke our hearts

"Heart for peace" was born out of the desire to raise the issue for discussion with students at different ages through art and creation"

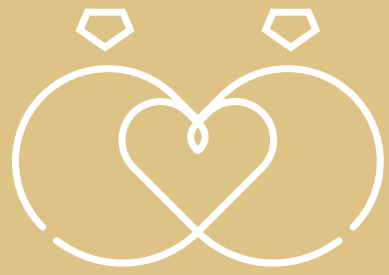

We were happy to take part in the "Love for Peace" project and we invite our friends from the Adat Shalom community NJ to take part in the project as well
